

# ABSTRACT AGIX

## Key to Online Abstract Submission

**Abstractmagix** is a software developed to collect and evaluate abstracts online which are going to be presented during the congress, in the desired format. Online abstract management and evaluation is one of the main and most important features of an event management system. Moving this service to a digital platform, eliminated the long-term operations of the secretariat and human based errors, at the same time upgrading the quality of the organization by contributing to cost saving. **Abstractmagix** solution eases the process of abstract editing and management through administrator interfaces. Thus, system administrators and committee chairmen can easily make all the settings of the system over the web.
