

BADGE MAGIX

Print Your Own Badge

Badge printing software is an integrated solution with your registration system and will grant you a one stop shop solution for badge printing. So how does it work?

Define the basic parameters of your event in our system.

Import Event Registration data. Once you have the final list of delegates that will attend your congress or conference you will be able to import the data to badge printing back office and generate a Barcode automatically for each delegate. The system will send a personal mail to each delegate with his barcode that he needs to bring with him to the event at the first day.
